TABLE OF CONTENTS

Vol. 49 No. 1 1990

KRZYSZTOF GOŹDZIEWSKI and ANDRZEJ J. MACIEJEWSKI / System for Normalization of a Hamiltonian Function Based on Lie Series 1

KERRY M. SOILEAU / Formulae for the Statistical Interrelationships Between Several Orbital Parameters of Particles in the Oort Cloud and Other Orbiting Aggregates 11

ANDRZEJ J. MACIEJEWSKI and ZUZANNA NIEDZIELSKA / Periodic Rotations of a Rigid Body Located at the Libration Point 31

JACQUES HENRARD / A Semi-Numerical Perturbation Method for Separable Hamiltonian Systems 43

NICOLE BORDERIES and PIERRE-YVES LONGARETTI / A New Treatment of the Albedo Radiation Pressure in the Case of a Uniform Albedo and of a Spherical Satellite 69

NICOLE BORDERIES / A General Model of the Planetary Radiation Pressure on a Satellite with a Complex Shape 99

Vol. 49 No. 2 1990

A. CARUSI, G. B. VALSECCHI, and R. GREENBERG / Planetary Close Encounters: Geometry of Approach and Post-Encounter Orbital Parameters 111

V. A. BRUMBERG and T. V. IVANOVA / Encounter in the Keplerian Field: Analytical Treatment 133

TATEOS A. AGEKIAN and JOANNA P. ANOSOVA / Distribution of Minima of the Current Size of the Triple Systems and Their Disruption 145

MICHAEL E. HOUGH / Analytic Continuation of Periodic Orbits from Equilibria of Two-Degree-of-Freedom Systems in Rotating Coordinates 151

M. ŠIDLICHOVSKÝ / The Existence of a Chaotic Region Due to the Overlap of Secular Resonances ν_5 and ν_6 177

V. A. SHEFER / Application of KS-Transformation in the Problem of Investigation of the Motion of Unusual Minor Planets and Comets 197

RICHARD L. BRANHAM, JR. / Recursive Calculation of Hansen Coefficients 209

Vol. 49 No. 3 1990

B. ELMABSOUT / Sur l'instabilité de certaines positions d'équilibre relatif dans le problème des ***n*** corps 219

F. M. F. EL-SABAA and H. H SHERIEF / On the Galactic Motion 233

COLIN R. McINNES and JOHN C. BROWN / The Dynamics of Solar Sails with a Non-Point Source of Radiation Pressure 249

JIA-QING ZHENG, MAURI J. VALTONEN, and LEENA VALTAOJA / Capture of Comets During the Evolution of a Star Cluster and the Origin of the Oort Cloud 265

FRANCESCO BORGHERO and ANTONIO MELIS / On Szebehely's Problem for Holonomic Systems Involving Generalized Potential Functions 273

JIE LIU and YI-SUI SUN / On the Sitnikov Problem 285

JUAN GETINO and JOSÉ M. FERRÁNDIZ / A Hamiltonian Theory for an Elastic Earth: Canonical Variables and Kinetic Energy 303

Vol. 49 No. 4 1990

LIDIA JIMÉNEZ-LARA and EDUARDO PIÑA / Periodic Orbits of an Electric Charge in a Magnetic Dipole Field 327

ANDREA MILANI and ZORAN KNEŽEVIĆ / Secular Perturbation Theory and Computation of Asteroid Proper Elements 347

KEVIN D. P. WOERNER / The N-gon Is Not a Local Minimum of U^2I for $N \geq 7$ 413
